

WORLD ANIMAL DAY 2022

*WHAT COLOR IS YOUR FAVORITE PASSERINE?
WORLD PASSERINES*

CUBAN TODY

Restricted to Cuba and the larger Caribbean islands. It inhabits dry lowlands, evergreen forests, coastal vegetation, and near streams and rivers.

EUROASIAN BLUE-TIT

native to the European continent. It inhabits mixed woodlands, as well as parks, gardens, and urban areas. Its diet consists mostly of insects and spiders.

YELLOW-BILLED OXPECKERS

Native to the savannah of Sub-Saharan Africa from Senegal east to Sudan. Nests in tree holes lined with hair plucked from livestock. Eats insects and ticks.

GREEN-HEADED THRUSH

Found in Atlantic forests in South America where it enjoys perching on top of trees. Although it prefers humid forests, it is also common in orchards and parks.

ORANGE-HEADED TRUSH

Common in well-wooded areas of India, China, and southeast Asia. Most populations are resident and show a preference for shady damp areas.
